

**FLEX** family health

**DIRECT PRIMARY CARE**

**Flex Family Health is the first Direct Primary Care clinic in Billings, MT and Yellowstone County. At Flex Family Health, rather than billing health insurance carriers for our services, we charge a low, flat rate each month to individuals, families or employers (on behalf of their employees) to access a full array of primary healthcare services. This allows increased healthcare access, affordability and transparency when compared to the conventional healthcare delivery system. Included in the monthly membership fee are extended appointments, same or next day appointments, unlimited clinic visits, and 24/7 access to the health care provider via phone, text, email, or video call. We also can offer our members lower cost lab testing, imaging, and prescriptions. Flex Family Health is not an urgent care clinic, although we can see you for most urgent care needs. We are a primary care clinic where we help our patients manage chronic diseases (high blood pressure, Diabetes, etc.) as well as provide wellness and preventative exams. At Flex we can meet 80-90% of the healthcare needs our members will ever have. If the need to access services outside of Flex Family Health arises, we will work hard to refer our patients to the highest quality and most affordable services available.**

### Employer Pricing:

**\$54** month/adult (age 18+)

**\$134** month/family (2 adults, 2 children) [\$15/extra child]

In addition to the monthly membership fee, there are certain procedures that are offered in the office that come with a small additional cost such as lab work, basic procedures (sutures, joint injections, skin biopsies, etc). We are transparent in all of our pricing for these ancillary costs. We offer the option for employers to be responsible for all or a portion of these costs, or we can pass these costs through to the patient directly. We also have relationships established to get our patients discounted x-ray services and prescriptions.
